

Travel meds and vaccinations at your door.

Just tell us when
and where.

TravelRx has changed the travel health services model. We've replaced the cumbersome, expensive and time-consuming process of clinic and pharmacy visits, reducing it to a one stop shop.

Our friendly clinical pharmacists will handle:

- Individual health evaluations
- Vaccines and medication preparation
- Onsite delivery of health services
- Trip specific health and safety recommendations

1

Fill out the intake form for each traveler and fax or email it to us.

www.ProgressiveTravelRX.com

2

the pharmacist arrives at your office with vaccines and medications.

We recommend 6-8 weeks lead time as some vaccines take longer to procure and take effect in the body.

A minimum of five travelers is required for an onsite visit. Fees are due prior to the onsite visit.

Travel vaccines and medications are typically not covered by insurance and are usually an out-of-pocket expense. For this reason, we do not accept insurance at this time. We encourage clients to submit claims to their insurance company for potential reimbursement.
